Iosif Angelidis was born in Cholargos, Attica, on 16/06/1993. He is a graduate of the Department of Informatics & Telecommunications of the National and Kapodistrian University of Athens, his undergraduate dissertation being in the area of "Theoretical Informatics", while he has completed his post-graduate studies in "Information and Data Management". He is a member of Management of Data and Information Knowledge Group ([MADgIK](#)) and the [AI group](#) of the University of Athens.

In the context of his MSc thesis, "Named Entity Recognition and Linking in Greek Legislation", under the supervision of professor Manolis Koubarakis and PhD Candidate Ilias Chalkidis, he developed and maintained a Named Entity Recognizer which recognizes and extracts persons, organizations, geo-political entities, legal references, public documents and unofficial geographical landmarks found in the Government Gazette by utilizing Neural Networks and Deep Learning technologies. These entities are being encoded as RDF data based on a Semantic Web ontology and then interlinked with other open public datasets (Greek Administrative Geography, Greek DBpedia Politicians, EUR-Lex) with Silk.

He has been a researcher, further developing, optimizing and maintaining the Named Entity Recognizer component he developed for the project [Nomothesi@](#) API, still contributing to the project when time allows. Also, he has worked as a researcher in Choronomothesia, a parallel project with the goal of extracting geospatial information and coordinates from tables of legal documents of the National Printing Office of Greece.

Experience

Jul 1, 2017 - Oct 7, 2019

Researcher

Developing, optimizing and maintaining the Named Entity Recognizer component of "[Nomothesi@](#)".

Developer and researcher in "Choronomothesia", another project parallel to "[Nomothesi@](#)" with the goal of extracting geospatial information and coordinates from tables of legal documents of the National Printing Office of Greece.

Focus on various aspects of knowledge harvesting, representation, reasoning and analytics.

Information extraction, web crawling, deep neural networks and machine learning, natural language processing.

Member of Management of Data and Information Knowledge Group ([MADgIK](#)) and the [AI group](#) of the University of Athens.

Jul 1, 2017 - Oct 31, 2017

Researcher

Researcher/software developer in the project "Copernicus App Lab" (Horizon2020, EU Research and Innovation Programme).

Interests

Apart from being a data scientist, I thoroughly enjoy travelling and visiting archaeological sites.

I strongly believe in the benefits of choosing swimming as a form of exercising over regular gymnastics. I used to go swimming for 6 years in boarding school and have taken a liking to it ever since. Of course, swimming does not have to be limited during summer, if one can endure the cold!

When forced indoors, I like talking about psychology, philosophy, mathematics, history and physics, or watching a good movie with friends (pretty much any genre, from horror to sci-fi to fantasy to comedy). Furthermore, I have been a gamer for a long time. I love playing almost all genres and fancy playing single player titles, or with friends. I definitely enjoy debating about games and their various aspects (gameplay, story, mechanics, gimmicks etc.). Moreover, I am an aspiring DJ with a twist: I seek mostly music featured in games!

I like spending a good amount of my free time exploring the open source community, learning about new technologies and tweaking computer systems.
